Foreword

Nova Scotia Agricultural Statistics was prepared as a ready reference on agricultural statistics. The tables were u-dated on January 31. Sources are listed at the foot of the tables in case users wish to check on the availability of more recent estimates. The contribution made by farm operators, processors, and others to Statistics Canada's surveys and other information gathering activities is acknowledged and appreciated.

Statistics Canada offers two ways to retrieve data electronically. Both of these sources are available on Statistics Canada's website at www.statcan.ca. On their home page, choose the English or French option. If you choose English, on the blue toolbar at the top of the page, click on "Our products and services". You then have the option of choosing CANSIM under the "Access our Online Databases", or for paper publications, under the "Browse our Internet Publications (PDF or HTML)", choose either the "free" option or the "For Sale" option. The Statistics Canada tables in the publication indicate whether the publication the information is sourced from is a free or cost publication. The Statistics Canada information contained in this publication is available under the Agriculture folder. There is a fee for information retried from CANSIM.
